

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

1. (CURRENTLY AMENDED) An information processing apparatus processing information and performing a plural window displays on a display device, comprising:
a screen memory for the display device; and
a processing unit outputting image data of a specific window of the screen memory to an external monitor;

wherein said processing unit executes plural tasks being started, displays each window according to said plural tasks on said display device, and displays an external monitor output selection menu in a menu bar of each of the plural window displays, to select said specific window whose said image data is output to said external monitor by said processing unit to be displayed.

2. (CANCELLED).

3. (PREVIOUSLY PRESENTED) The information processing apparatus according to claim 1, wherein said processing unit outputs image data of a single effective window selected to the external monitor among plural windows of the display device.

4. (PREVIOUSLY PRESENTED) The information processing apparatus according to claim 1, wherein said processing unit displays the selection menus of the external monitor output with a plurality of output modes in the menu bar of the window of the display device.

5. (ORIGINAL) The information processing apparatus according to claim 1, wherein said processing unit starts up a display application program for the output of said external monitor according to starting of an operating system.

6. (CANCELLED).

7. (ORIGINAL) The information processing apparatus according to claim 1, wherein

said processing unit executes an application for reproducing an image.

8. (CURRENTLY AMENDED) A method of controlling a display device , comprising:
executing plural tasks to be started;
displaying plural windows of each of said tasks on said display device; and
outputting image data of a selected window ~~to an external monitor~~ among said plural windows to an external monitor, wherein said displaying ~~comprising~~ comprises displaying an external monitor output selection menu on a menu bar of each window of the display device to select said selected window whose said image data is output to said external monitor.

9. (CANCELLED).

10. (PREVIOUSLY PRESENTED) The method according to claim 8, wherein said outputting comprises outputting the image data of an effective window to be selected by pointing to said selection menu to the external monitor among plural windows of the display device.

11. (PREVIOUSLY PRESENTED) The method according to claim 8, wherein said displaying comprises displaying the selection menus with a plurality of output modes to said external monitor on the menu bar of the window of the display device.

12. (PREVIOUSLY PRESENTED) The method according to claim 8, further comprising starting a display application program for the output of the external monitor according to starting of an operating system of the external monitor according to starting of an information processing apparatus.

13. (CANCELLED).

14. (PREVIOUSLY PRESENTED) The method according to claim 8, wherein said displaying comprises displaying a reproduction image on said window.

15. (CURRENTLY AMENDED) A computer-readable storage medium storing a program for a display device causing a computer to execute:
displaying plural windows of each executed tasks on said display device; and

outputting image data of a selected window to an external monitor among said plural windows,

wherein said displaying comprises displaying an external monitor output selection menu on a menu bar of each window of the display device to select said specific window to select said specific widow whose said image data is output to said external monitor to be displayed.

16. (CANCELLED).

17. (PREVIOUSLY PRESENTED) The information processing apparatus according to claim 4, wherein said processing unit displays a plural kind of selection menus of the external monitor output to indicate an always output and an output when effective to said external monitor in the menu bar of the window of the display device.

18. (PREVIOUSLY PRESENTED) The method according to claim 11, wherein said displaying comprises displaying a plural kind of selection menus to indicate an always output and an output when effective to said external monitor on the menu bar of the window of the display device.
